

ADVENTURER

ROOMY, COMFORTABLE & ELEGANT

901SB Canvas Decor

A PREMIUM RV MANUFACTURER SINCE 1969

ADVENTURER Value Leader in Comfort and Innovation

SOLAR POWER OPTION

The solar panel option gives you green, off-grid power, keeping your batteries charged on the road.

110V POWER

The Cummins/Onan 2500W optional generator provides 110v electrical power when needed at the touch of a button.

ROOF RACK STORAGE

This optional roof rack provides additional storage when needed for kayaks, canoes, skis or any other items.

COMFORT STEP BUMPER

This is a Adventurer Manufacturing Exclusive powder coated non-skid entry step system.

HAPPIJAC PULL OUT STORAGE TRAY

This lightweight metal ball bearing tray provides quick access to your storage.

WINEGARD AIR 360 HD DOMED ANTENNA

This New Omni Directional Antenna provides reliable hands-free TV and radio reception.

GALLEYS ENGINEERED TO PLEASE

Canvas Decor

GALLEY 89RB

The 89RB galley has been a hit from day one because of its counter space, abundant drawers and storage. The forward galley design and large windows give you a spacious feel while living on the road.

GALLEY 89RBS

This unique floorplan features a new galley design with additional storage, a stainless steel sink and state of the art appliances. The abundant counter space, cabinet storage and soft closing drawers give this kitchen room for everything you need to cook great meals on the road.

Dark Night Decor

GALLEY 80RB

This self-contained and fully-featured model has everything you need and then some! The L-shaped, radius designed galley gives you more counter space and room making the 80RB feel like a much larger camper.

QUEEN AND KING BED SUITES

89RBS QUEEN BEDROOM SUITE

A beautiful, spacious design featuring dual windows, a double door wardrobe and an entertainment center with optional LED 12 volt TV and AM/ FM/ CD/ DVD/ BLUETOOTH Stereo.

Dark Night Decor

Dark Night Decor

80RB NORTH / SOUTH BEDROOM

Enjoy the roomy north/south bedroom with the Camper Caddy for additional storage. Notice the dual bedroom windows which provide vast views from your bedside and comfortable cross ventilation to enjoy that cool evening breeze when sleeping.

ADVENTURER DINETTES

89RB DREAM DINETTE

Enjoy the spacious living area of the 89RB dinette that provides camping comfort with a large, gorgeous window that really opens up this floorplan. Most of our floorplans come with the Dream Dinette® which eliminates that annoying table leg, giving you much more leg room and easily turns into a bed with the flip of a lever.

910DB U-SHAPED DINETTE

This floorplan features a large U-shaped dinette with a sliding D-Style table, allowing you to adjust to use from a face-to-face style dinette to a U-shaped lounge. This model features another Adventurer Exclusive - the Electric Power Bunk® (optional).

This 26"x76" power bunk moves down easily with the push of a button. You can still use the lower rear section as a second bunk if needed, all the while your dinette stays in the made up position! And if you want another adult bed, then you can make down the dinette for a 48"x72" additional bed and still have use of the Power Bunk®, sleeping a total of 5 adults in this camper.

ADVENTURER NON-SLIDE FLOOR PLANS

80RB

Fits SB & LB Trucks
(5.5' SSB 6' and larger SB & 8' LB)

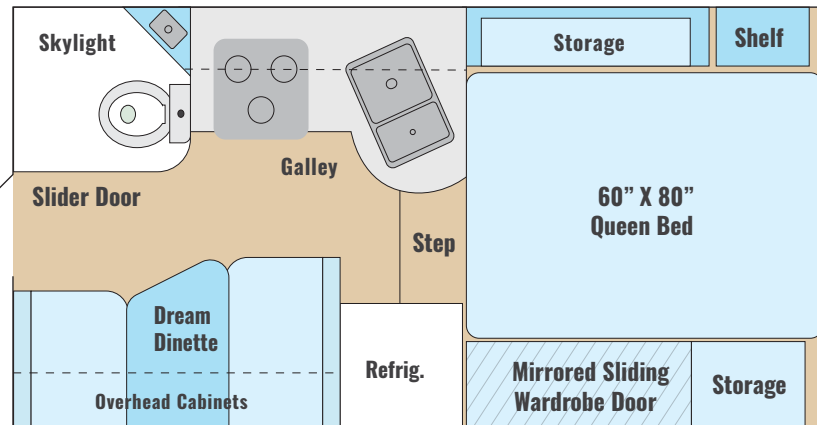

86FB

Fits SB & LB Trucks
(6' and larger SB & 8' LB - Gen capable with both)

89RB

Fits SB & LB Trucks
(6' and larger SB & 8' LB - Gen capable with both)

901SB

Fits SB & LB Trucks
(6' and larger SB & 8' LB)

ADVENTURER NON-SLIDE FLOOR PLANS

INDUSTRY LEADING STANDARD FEATURES

- 12V battery disconnect switch
- 45-amp electronic power converter with “smart” battery charger
- Automatic changeover LPG regulator (dual tank models)
- All wood, full extension drawers with soft/self closing ball-bearing metal guides
- Black tank flush system (N/A 80RB)
- Custom keyed deadbolt entry lock - safer & secure
- Detachable 30-amp 110V power cord
- Dream Dinette – no annoying table leg in the way and easily converts into a bed with the flip of a lever (select models)
- Emergency cabover egress
- Expandable shower curtain rod (910DB dry bath model)
- Exterior sewer hose carrier
- Fantastic fan
- Fire Extinguisher, LPG, Carbon Monoxide and Smoke Detectors
- Go Power® Solar pre-wire for up to 300W of solar (N/A 80RB)
- Hardwood cabinet doors and face frames
- Moon roof (N/A 80RB)
- High gloss gel-coat fiberglass exterior
- Double density foam w/designer cover
- Large folding entry assist handle
- LED interior and exterior lighting - minimal battery draw for longer camping.
- New generation Happi-Jac 4200 manual jacks - just add motor kit for wireless remote electric
- Night shades for all windows (mini blind in kitchen to meet code)
- One-piece seamless TPO (Thermal Poly Olefin) insulated roof with 12-year manufacturer warranty
- Outside shower
- Rear roof ladder - Phat® Ladder
- Residential-style cabinet hardware
- Sealed three-burner cooktop w/oven (N/A 80RB)
- Shurflo quiet revolution water pump
- Simulated padded ceiling—Elegant look of leather and easier to clean, no odor, mold or mildew like fabric/carpet
- Sink cover cutting board (select models)
- Systems control center
- Thermopane windows - quieter, cooler and warmer (N/A 80RB)

CONSTRUCTION & SPECIAL FEATURES

Adventurer TCC Construction

Continually striving to be the Best!

Best Framing

Aircraft quality welded aluminum framing with lumber core insert for superior strength and structural integrity. Adventurer frames and adds gussets around all windows, entry and baggage doors (901 SB, 910 DB and 89 RBS models).

Best Tie-Down Brackets

Adventurer feels that tie-downs are a critical construction area. That is why we use galvanized tie-down brackets bolted through our TCC laminated wing, through angle aluminum with large carriage bolts and body washers giving our Adventurer owners the tight tie-down attachments.

Best Insulation

Adventurer exclusively uses “closed cell” block foam insulation which provides more R-Value per inch than standard foam board. This is the same foam used to manufacture coffee cups which also does not allow liquid penetration.

Best Wall Supports

Adventurer always uses “custom aluminum extrusions” creating a solid side wall attachment point that cradles the side wall with full support. The wall is glued with construction adhesive, clamped and lag screwed together, giving our owners solid wall supports.

“We’re never satisfied until Good is Better... and Better is Best”
Erdman Epp, Founder

MATCHING A CAMPER TO A TRUCK

When purchasing a truck camper, there are a few important factors to consider...

1. THE PAYLOAD CAPACITY

This may be posted in the glove box of your truck, but if not another way to determine payload capacity would be to weigh your truck full of fuel and people (don't forget the dog!) and subtract that weight from the GVWR posted on the door of your truck (see example to the right). The difference would equal your payload capacity which is the weight of camper you can carry. For example, if your truck weighs 6800lbs and the GVWR on the door reads 9900lbs, your payload would be 3100lbs (9900lbs - 6800lbs = 3100lbs).

2. ANOTHER WAY TO DETERMINE PAYLOAD

Check the tire sticker on the door post of your truck (see below). This sticker is added on newer trucks stating tire load or payload rating.

3. GVWR (Gross Vehicle Weight Rating)

Refers to the maximum weight the manufacturer rates that truck to carry, including weight of the truck with all people, cargo, fuel etc.

4. GAWR (Gross Axle Weight Rating)

Refers to the maximum rating the manufacturer rates the axles to carry. To determine these ratings on your truck with cargo (camper), weigh your truck again with just the front and then just the rear axle on the scales. This will give you your axle ratings for your truck and camper combination. These ratings are usually posted on the driver's side doorpost.

5. TIRE CAPACITY (The Rating of Your Tire)

You can find this in tiny fine print on the sidewall of your tire (see photo to the left). It's usually located behind the tire inflation number. This will usually be a direct correlation to the axle ratings and GVWR on new trucks. This will always be your weak link in your weight carrying capacity and should always be checked before carrying any load, including a passenger car for that matter. SAFETY ALERT – Always make sure you choose tires with the proper load capacity to handle whatever load you are carrying with your vehicle. Another way to determine payload is from the tire sticker on the door post of your truck (see left again). This sticker is added on newer trucks and states the tire load or payload rating.

6. COG (Center of Gravity)

Also known as Center of Balance, COG is the point that the weight of your camper is balanced. We note the COG on every camper with a large red arrow. This is determined as it is weighed and balanced post-production. Your camper COG should fall into the “load range” of your truck and you can refer to your owners manual for this measurement. As you can see in the example to the right, the COG of this camper easily falls into the load range of this truck. As the owner, it is your responsibility not to exceed the weight or COG specifications of your truck when purchasing a truck camper. Remember safety first before loading a camper on your truck. If you require assistance, please consult your dealer who can help you select aftermarket items designed to aid in this combination.

7. SUSPENSION ENHANCEMENTS

Suspension enhancements allow you to manage your load but does not change or add to a truck’s GVWR. In some areas you can make upgrades to your truck and then have it inspected by a DOT (Department of Transportation) to increase your “legal” GVWR. In other areas you can increase your “legal” GVWR at your licensing agency by simply making a payment. (Check with your local licensing agency for details)

TORKLIFT STABLE LOADS

This is a product we use and recommend. Today’s truck manufacturers market trucks to be our everyday driver, thus they want the empty loaded truck to be as smooth a ride as possible. To accomplish this they

lower the overload spring (the heavy weight bearing springs) from 3” to 4” to give that smoother ride when empty. The problem with this is when you add any weight to the truck it appears to be sitting low in the rear or “overloaded” since the vehicle has had to drop before it touches the overload spring. Stable Loads by Torklift simply fill this space so that as soon as you add the load, the weight immediately sets on the overload springs, allowing your trucks suspension to do what it was designed to do, carry a load which is a camper in this case.

AIR BAGS

We use and recommend air bags in the correct application. Some truck manufacturers recommend airbags in all

applications and suggest you inflate them 80 to 100 lbs in the bags. We don’t recommend air bags to be used in this way because in too many cases this will raise your camper up off of the suspension causing you to have a spongier, unsafe ride. If you choose air bags we only recommend you inflate them so that you are just touching the overload springs of your truck for the best ride and handling capabilities.

ADVENTURER

Truck Campers

Factory tours welcomed!

We invite you to visit our manufacturing facility located in Yakima, WA.

Tours are available by appointment.

To make one, please call:
