

# RESISTALL® ALL GLASS

The ResistAll All Glass program utilizes ResistAll Spray-On Windshield Sealant on all your recreational vehicle's glass.\* This patented solution was scientifically engineered to strengthen auto glass and repel water. Auto and RV glass surfaces have inherent defects and flaws at the microscopic level that can weaken the glass structure over time, leading to chips and cracks.

ResistAll Spray-On Windshield Sealant seals these imperfections by covalently bonding to the glass and curing to a durable, invisible finish.

\* Glass refers to the front windshield, windows, sunroof, and rear windshield of your recreational vehicle.

RESISTALL®  
ALL GLASS

DECREASES REPAIR &  
REPLACEMENT COSTS

HELPS PREVENT CHIPS & CRACKS  
IN RECREATIONAL VEHICLE GLASS

RESISTALL®  
ALL GLASS

ResistAll Spray-On Windshield Sealant, when properly applied, reduces chipping and cracking from road debris and improves beading and repellency of water.

LATEST  
TECHNOLOGY

**NOT** a window film.  
A patented liquid chemical solution.

REDUCES  
REPAIR COSTS

Helps decrease the chips and cracks that can lead to costly RV window replacements.

IMPACT  
RESISTANT

Increases impact resistance up to **80%**

INVISIBLE  
FINISH

Does not alter the look, clarity, reflectivity, or light transmission of the glass

SCIENTIFICALLY ENGINEERED

ResistAll Spray-On Windshield Sealant is a liquid chemical solution that cures to an invisible finish to help protect the RV glass from chips and cracks. It does not alter the look, clarity, reflectivity, or light transmission of the glass. In addition, it has a hydrophobic (water repellent) quality that helps water bead up and run off improving driver visibility in wet weather conditions.

SAFE FOR THE ENVIRONMENT

The ResistAll Spray-On Windshield Sealant formula was engineered at Rice University to be environmentally friendly while reducing the amount of discarded recreational vehicle glass entering landfills.
